Sir:

In response to the Office Action dated October 30, 2002, please amend the above-identified application as follows:

IN THE CLAIMS:

Please enter the following amended claims:

1. (Once amended) A speaker cone, comprising:

a base portion having a front end and a rear end,

wherein the front end contains at least one discontinuity such that a first distance from a reference point on a longitudinal axis of the base portion to a first point on the front end is different than a second distance from the reference point to a second point on the front end,

wherein a latitudinal cross-section of said base portion has a shape of a closed conic section,
